

Total Body Inflammation & Pain Management

NEW: Assisi Loop Lounge™
by Assisi Animal Health

At home or on the go, in the comfort of the safest,
crash-tested pet carrier

The Assisi Loop Lounge is a prescription-only, non-pharmaceutical, anti-inflammatory device (NPAID®) that:

- + Accelerates healing
- + Reduces inflammation
- + Alleviates pain

The Assisi Loop Lounge is the only therapeutic pet bed that incorporates an FDA cleared, prescription PEMF (Pulsed Electromagnetic Field) device that is backed by peer-reviewed clinical research in veterinary medicine. With the Assisi Loop's® targeted (tPEMF™) technology, the Loop Lounge delivers a microcurrent targeting the body's own natural anti-inflammatory process.

This microcurrent enhances nitric oxide production, accelerating the healing of soft and hard tissues—including the skin, tendons, ligaments, bones, and organs. The Assisi Loop Lounge is effective alone and can be used adjunctive to other therapies.

The Assisi Loop Lounge is available in two sizes. The Sleepypod Atom carrier contains one therapy pad and is 10.5 inches by 17 inches. The Sleepypod Air carrier holds three therapy pads, measuring 8–10.5 inches by 22 inches.

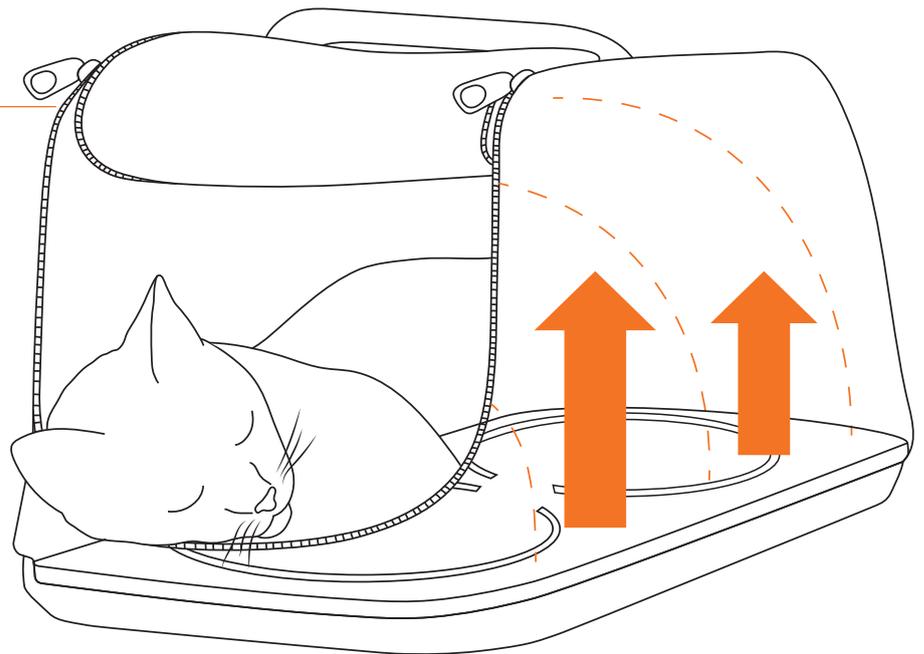

The Assisi Loop Lounge features:

- + Total body treatment
- + Rechargeable at home or on the go
- + Therapy pads designed to complement an award-winning pet carrier

In collaboration with Sleepypod®, the Assisi Loop Lounge creates a contained, comfortable space for healing that can be used at home or on the go, especially when an animal may not be inclined to sit still.

With a treatment field that extends up to 10 inches from the floor of the carrier, any small animal is guaranteed not only nose-to-tail, but also toes-to-top-of-ears treatment. Sleepypod carriers are award-winning, crash-tested, independently tested, and certified with a top safety rating from the Center for Pet Safety.

A total body inflammation and pain management product for larger animals will be available in 2019.
